

DEPARTMENT OF TRANSPORTATION AND REGULATORY AFFAIRS

Section 12-B Authorized Aviation Entity Registry

Document Control ID: OPA-993 | Revision Status: 4.1 | Issuance Date: 2023-10-15 | Governing Authority: Directorate of Flight Standards

a. The following tabular directives establish the registered parameters for entities engaged in commercial aviation operations under current administrative oversight.

Master Registry of Authorized Air Carriers Matrix

Primary Carrier Registration Information	
Designator Alpha	The air carrier identified by code 20342 has a designated description. Carrier 19259 is officially described in the aviation registry. These initial classifications are mandated to undergo biennial fleet inspections to maintain active operational status. Air carrier 19082 has an officially registered description. The air carrier identified by the code 21434 has a specific description. Maintenance logs for all active aircraft must be submitted electronically to the central database by the end of each fiscal quarter.
Designator Beta	Carrier 19594 is officially named Devoe Airlines. The air carrier associated with identifier 19532 operates under the name Compagnie Natl Air France. Devoe Airlines recently expanded its domestic routing to include three additional midwestern hubs to alleviate seasonal passenger congestion. The description for the air carrier associated with identifier 19488 is Inter-Quebec (Intair): QB. The air carrier assigned the identifier 19316 has a formal description. Historical performance data indicates that Inter-Quebec primarily serviced regional airports before undergoing comprehensive corporate restructuring in the late 1990s.
Designator Gamma	The air carrier identified by 21395 is formally registered as Virgin Blue International Airlines. The air carrier identified by the code 19240 has an official description. Virgin Blue International Airlines was originally founded to provide low-cost alternatives on high-density routes across the Pacific corridor. The air carrier identified by the code 20419 has a specific description. The air carrier associated with ID 21427 is officially incorporated as AeroLogic GmbH. Regulatory audits for these carriers are scheduled concurrently to optimize inspector resources and minimize operational disruptions during peak transit periods.
Designator Delta	The air carrier associated with the identifier 20148 has a specific description. The air carrier designated by the identifier 19209 has a specific description. AeroLogic GmbH operates primarily as a cargo airline, utilizing a fleet of wide-body freighters for intercontinental logistics and supply chain support. The air carrier identified by the code 20242 has a registered description. The air carrier identified by the code 19896 has a registered description. Environmental compliance reports for the preceding calendar year must be appended to the primary operational manual prior to the finalization of their annual certification renewal.

Air Carrier Registration And Operations Specifications

Document Reference: OPS-SPEC-2024 Revision Status: Current Active Effective Date: 2023-11-01

a. The following registered identifiers and corresponding operational descriptions denote authorized air carriers subject to centralized regulatory oversight.

Table 3.1: Commercial Aviation Operators Identification Matrix

Official Entity Registration Details	
Certification Group A	Air carrier 19096 is officially registered as American Inter-Island Inc. The air carrier identified by the entity code 19092 has a specific description. These descriptions are maintained in the central aviation database to ensure international compliance with standard routing procedures, air traffic communications protocols, and integrated flight tracking methodologies.
	Air carrier 19222 has an officially registered description. The description for the air carrier with ID 19478 is recorded as Norcanair: NKQ. Aircraft utilized under these specific operational designations are subject to continuous airworthiness maintenance programs that are strictly verified by the civil aviation authority during periodic station audits.
Certification Group B	The description for air carrier 19507 begins with Yugoslav Airlines. The air carrier designated by the identifier 20066 operates under the full name Advance Air Charters. Charter and scheduled operations must conform strictly to the structural and operational limitations specified in domestic transportation codes, depending heavily on passenger capacity metrics and maximum payload configurations.
	The description for air carrier 20265 is Freedom Airlines d/b/a HP Expr: F8. The air carrier designated by the ID 19085 has a registered description. Subsidiary commercial agreements and "doing business as" filings require formal operational re-authorization from the regulatory board whenever the parent holding company alters its primary maintenance base or dispatch facility.

<--- Page Split --->

Continuation of Table 3.1: Commercial Aviation Operators Identification Matrix

Official Entity Registration Details (Continued)	
Certification Group C	The air carrier code 20182 corresponds to a specific airline. Air carrier 19438 has an officially registered description. Documentation regarding these authorized operating carriers is securely archived within the national repository for a minimum duration of thirty-six calendar months following any administrative change in their active operating status.
	The air carrier registered under ID 21196 has a specific official description. The air carrier associated with identifier 20363 has a registered description. Field inspectors routinely utilize these precise bureaucratic designations during unannounced ramp checks to meticulously cross-reference flight crew credentials against approved company dispatch management systems.
Certification	Carrier 21070 has the description Globespan Airways Limited d/b/a Flyglobespan: Y2.

Group D The air carrier identified by the code 19891 has a specific description. Trans-oceanic and cross-border commercial transport operations executed by these corporate entities mandate the physical presence of specialized navigation technology and survival equipment aboard every deployed aircraft.

The description for air carrier 19482 is Air Niugini: NUQ. Air carrier 19951 is described as Braniff International Airlines Inc.: BE. Rigorous regulatory oversight of these legacy or internationally recognized operating certificates ensures uninterrupted continuity of baseline safety standards regardless of the operator's initial date of registry.

The description for air carrier 20239 is All Canada Express: CEQ. The air carrier identified by the entity code 19600 has an official description. These specific operational certifications are subject to comprehensive annual review under part 121 regulations, ensuring strict compliance with international safety protocols and bilateral aviation agreements.

The entity identified by the code 19044 is an air carrier. The entity with the identifier 21589 is an air carrier. Routine audits of this specialized registry segment occur biennially, capturing fleet expansions, systemic operational adjustments, and amendments to approved maintenance programs.

The air carrier designated by ID 21979 is formally recorded as Western Air Charter, Inc. The air carrier identified by the code 19357 has a specific description. Documentation requirements for these authorized entities mandate strict adherence to the standardized alphanumeric coding framework recently issued by the central aviation administrative authority.

The description for the air carrier with the identifier 21029 is Harris Air Services: HBQ. Air carrier number 19897 is officially registered with a specific description. Secondary verification procedures and physical ramp inspections are periodically enacted to systematically reconcile operational database discrepancies among regional and international operators.

The air carrier designated by the code 19727 has a specific operational description. The air carrier identified by the code 19349 has a specific description. Any substantive modifications to corporate designations or primary operating bases must be filed electronically through the designated administrative portal within a strict thirty-day mandatory window.

The description for the air carrier with ID 19471 is Transmeridian Air Cargo Ltd. The air carrier identified by the code 21605 has a registered description. Existing ground handling contracts and third-party logistics agreements associated with these operating certificates remain provisionally valid pending the final regulatory safety determination by the oversight committee.

Air carrier 19720 has a specific registered description. The entity identified by the code 19220 represents a specific air carrier. Operational payload limits for these identified operators expressly exclude scheduled cargo flights exceeding a maximum certified takeoff weight of 75,000 pounds unless explicitly authorized via a secondary waiver.

The description for air carrier 19810 is Mid Pacific Airlines Inc.: MPA. The entity identified by the code 19229 is classified as an air carrier. Archival administrative records detailing historic passenger routes and discontinued charter operations are maintained indefinitely in the supplementary offline data repositories for long-term compliance tracking.

Authorized Air Carrier Operational Specifications (Continued)

Control Number: FAA-OP-SPEC-992 Revision Date: 14-OCT-2023 a. The following entities are authorized to conduct operations in accordance with the stipulations recorded herein.

Authorized Air Carrier Master Data Table

Air Carrier Entity Classifications and Corresponding Regulatory Descriptions		Operational Compliance Remarks
Carrier ID: 19766	Air carrier 19766 has a designated description. The aforementioned operational description remains subject to periodic review by the regulatory oversight committee. Equipment maintenance logs must be maintained at the primary maintenance facility for no less than thirty-six months.	Compliance verified.
Carrier ID: 19735	The air carrier associated with the identifier 19735 has the description Island Air Express: IEX. Operating certificates for this entity require renewal prior to the end of the fiscal year. Additional localized noise abatement procedures apply when operating out of secondary coastal hubs.	Active authorization maintained.
Carrier ID: 19393	The air carrier designated by the identifier 19393 has a specific official description. The carrier is authorized for both domestic passenger transport and ad-hoc charter operations. Ground handling protocols are governed by standard industry safety manual revisions published last quarter.	No outstanding violations.
Carrier ID: 19687	The air carrier identified by the code 19687 has a designated description. This description encompasses all subsidiary operations functioning under the primary corporate umbrella. Mandatory security training for flight crew personnel must be logged and audited biannually.	Pending review.
Carrier ID: 19790	The air carrier designated by the identifier 19790 is formally incorporated as Delta Air Lines Inc. All flight operations conducted under this designation adhere to part 121 domestic regulations. The primary dispatch center is responsible for monitoring all transoceanic routing modifications in real time.	Cleared for international transit.
Carrier ID: 19805	Carrier 19805 is officially registered as American Airlines Incorporated. Corporate compliance officers have filed the necessary operational safety affidavits for the current calendar year. De-icing procedures must follow the specialized guidelines documented in appendix B of the winter operations manual.	Approved.
Carrier ID: 19977	Carrier 19977 holds the registered corporate name 'United Air Lines Inc.' This entity operates a mixed fleet of narrow-body and wide-body aircraft across a global route network. Annual pilot proficiency checks are to be conducted using Level D full flight simulators exclusively.	Approved.
Carrier ID: 20046	The air carrier identified by the code 20046 is Air Wisconsin Airlines Corp. Regional connection services provided by this entity are subject to the interline baggage transfer agreements filed in section four. Aircraft weight	Active status verified.

and balance calculations must be electronically verified prior to pushback from the gate.

Carrier ID: 20237	The entity associated with the identifier 20237 is an air carrier. Registration documentation for this entity was updated to reflect structural changes in executive management. Minimum equipment list (MEL) deferrals are strictly limited to seventy-two hours for Category B items.	Subject to random audit.
Carrier ID: 20304	The air carrier is identified by the code 20304. All route proving runs have been successfully completed as mandated by the initial certification board. Crew rest requirements strictly adhere to the updated fatigue risk management system framework.	Standard authorization.
Carrier ID: 20366	Air carrier 20366 has an assigned operational description. The corresponding operational description dictates the specific parameters under which hazardous materials may be transported. Cabin crew familiarization flights must be documented before personnel are assigned to the active duty roster.	Restricted payload clearance.
Carrier ID: 20368	The entity 20368 represents an air carrier. Documentation proving adequate financial reserves has been submitted to the economic compliance division. Supplemental oxygen systems on all assigned aircraft have undergone hydrostatic testing within the last sixty months.	Financial audit complete.
Carrier ID: 20398	The airline carrier assigned the ID 20398 has a specific description. Its operational description is recorded within the master regulatory database for scheduled maintenance tracking. Line station provisioning contracts are to be reviewed annually by the procurement and safety joint committee.	Line operations authorized.
Carrier ID: 20409	The air carrier associated with the code 20409 has a specific description. Associated operational capabilities include low-visibility approach authorizations down to Category IIIb minimums. Routine runway condition reports must be directly integrated into the carrier's proprietary electronic flight bag software.	Advanced navigation approved.
Carrier ID: 20416	The air carrier designated by the code 20416 has a specific official description. Registration profiles indicate compliance with all contemporary environmental emission standards for turbofan engines. Noise abatement departure profiles are strictly enforced prior to 0600 local time at all metropolitan hubs.	Environmental waiver applied.
Carrier ID: 20427	The air carrier identified by the code 20427 has a designated description. Authority is granted to perform in-house heavy maintenance checks under a separate repair station certificate. Third-party ground handling agents must undergo a customized security briefing before interacting with the carrier's active aircraft.	Maintenance authorization valid.

FEDERAL AVIATION ADMINISTRATION REGULATORY OPERATIONS SPECIFICATION

Section D.4 Carrier Designation Specifications

Document Control ID: 884-OPS Revision Status: Active Revision 04 a. Ensure all listed carrier designations are verified against the master certification database prior to dispatch authorization.

Authorized Operator Roster

Primary Air Carrier Identification Parameters		
Sequence Code	Carrier Data Block Alpha	Regulatory Remarks
	Registration Details	Compliance Notes
001	The air carrier designated by the ID 20436 is Frontier Airlines Inc. The air carrier associated with the identifier 20445 has a recorded description. Routine operational audits are mandated for all entities listed within this regulatory bracket to ensure ongoing compliance.	Verified
002	The air carrier identified by the ID 20452 has a specific description on file. The air carrier designated by the ID 21167 is Compass Airlines. Compliance with standard atmospheric tracking protocols is actively monitored by the central oversight committee.	Verified
003	The description for carrier 20342 is exactly 40-Mile Air: Q5. The description for carrier 19259 is Nor East Commuter Airlines: NEC. Seasonal scheduling adjustments must be formally submitted to the registry no later than forty-five days prior to expected enactment.	Pending Review

<--- Page Split --->

Authorized Operator Roster (Continued)

Primary Air Carrier Identification Parameters		
Sequence Code	Carrier Data Block Alpha	Regulatory Remarks
	Registration Details	Compliance Notes
004	The description for air carrier 19082 is Alamo Commuter Airlines: ACS. The description for air carrier 21434 is Corsair International: SS. Failure to update fleet maintenance logs promptly will result in the immediate suspension of standard routing privileges across controlled sectors.	Verified
005	The designated abbreviation code for this airline is DVO. The official carrier designation code assigned to this company is AF. Interdepartmental communications regarding these designated abbreviations are strictly restricted to secured, encrypted channels to prevent data leaks.	Restricted
006	This description is recorded exactly as Seaco Airlines Inc.: SCO. This specific airline trades under the commercial name V Australia. International	Verified

branding agreements dictate specific operational livery requirements that must be visible for all cross-border flights.

<--- Page Split --->

Authorized Operator Roster (Continued)

Primary Air Carrier Identification Parameters		
Sequence Code	Carrier Data Block Alpha	Regulatory Remarks
	Registration Details	Compliance Notes
007	The official description for this carrier is Aero Commuter: LOS. The description for this carrier is Aerolineas Nicaraguenses: RL (1). All operational certificates associated with these corporate profiles must be renewed on a biennial basis through the appropriate administrative portal.	Verified
008	The designated flight code used by this carrier is 3S. The description of air carrier 20148 is Martinair Holland N.V.: MP. The central registration database ensures real-time synchronization of these operational parameters across all regional dispatch offices.	Verified

Authorized Carrier Operational Descriptions (Continued)

Control: OP-SPEC-882 | Revision: 14 | Effective: Q3-2024

e. Verify carrier description parameters against the centralized registry prior to dispatch authorization.

Carrier Designation and Administrative Registry Declarations		
Registry Batch 004	Designation File 13-14	The description for this air carrier is Gull Air Inc.: GUL. The description for this carrier is North Vancouver Air: NXQ. Operating certificates and associated navigational authorizations for these corporate entities must be renewed in strict accordance with continuous federal oversight mandates, ensuring zero lapse in cross-border airworthiness certifications.
	Designation File 15-16	The description for carrier 19896 is Fast Air Carrier Ltd.: UD. This carrier utilizes the abbreviated identifier AMI. The regulatory audit established a baseline compliance threshold that ensures routine safety checks and maintenance verifications are uniformly met across all operational bases.
	Designation File 17-18	The description for this air carrier is Air-Lift Associates Inc.: ALE. The description for carrier 19222 is Hyannis Aviation: HYA. Furthermore, comprehensive insurance liability documents, including third-party indemnification clauses, are permanently archived at the central compliance repository for immediate retrieval during unexpected compliance inspections.

	Designation File 20-21	Following the airline name, the description includes the code JU. This specific air carrier is officially assigned the three-letter abbreviation AAQ. Designated regional inspectors routinely verify the validity and international recognition of these operational designators during unscheduled spot evaluations at major transit hubs.
Registry Batch 005	Designation File 23-24	The description for this carrier is Astec Air East Inc.: AEC. The description for the airline with code 20182 is Lapa-Lineas Aereas Privadas: MJ. Maintenance logs and structural integrity reports associated with these registry items require countersignature approvals from explicitly authorized and certified aeronautical mechanics.
	Designation File 25-26	The description for air carrier 19438 is Burlington Northern Inc.: XAI. The description for this carrier is recorded as ACM AIR CHARTER GmbH: OCQ. Foreign and domestic registry databases synchronize this classification information on a stringent biannual schedule to prevent air traffic control routing discrepancies.
	Designation File 27-29	The description for this air carrier is Endeavor Air Inc.: 9E. The description for this air carrier is Aeropuma: PUQ. Subsequent adjustments to seasonal fleet capacity or aircraft substitution procedures do not implicitly alter the carrier's baseline structural permissions documented within this index.
	Designation File 33-34	The description for this carrier is Williams Air Inc.: WIR. The description for air carrier 19044 is recorded as Chitina Air Service: CHI. All revisions, amendments, or voluntary suspensions applied to the active carrier index are strictly monitored and permanently recorded by the international administrative governance committee.

<--- Page Split ---> Continued: Carrier Operations Specification Table

Authorized Entity Registration and Designation Protocols	
The description for the air carrier 21589 is Twin Cities Air Service LLC: 1MQ. Western Air Charter, Inc. operates under the 'doing business as' (d/b/a) name Jet Edge. This authorization remains contingent upon satisfactory completion of the biennial regulatory compliance audit, assessing adherence to current domestic traffic control stipulations for chartered operations.	Validated via Regional Assessment
The description for this air carrier is Skyfreight: TIS. The description assigned to air carrier 19897 is Lineas Aereas Mayas (Lamsa): MYQ. The issuance of amended operating certificates for international freight carriers requires formal review by the regional oversight committee prior to final authorization.	
The description recorded for this carrier is Skybus Inc.: FW. The description for this carrier is Oceanair Line: TCE. Operational mandates specify that any fleet expansions by authorized entities must be documented within forty-five days of initial asset acquisition to maintain valid status.	Pending Secondary Verification

The description for this carrier also includes the designation KKQ. The description for this carrier is VRG Linhas Aereas S A: G3. Previous exemptions granted under subclass regulations regarding foreign-operated passenger aircraft are scheduled for evaluation during the upcoming fiscal quarter by assigned personnel.	
The description for air carrier 19720 is Exec Express: EEX. The official description for this carrier is Skystream Airlines: HUB. Furthermore, maintenance logs for pressurized aircraft cabins assigned to commercial commuter schedules must be retained at the principal base of operations for no less than five years.	Routine Compliance Logged
The official description recorded for this air carrier is Sunbelt Airlines Inc.: JAM. The description for this air carrier is Helitrans: HEL. Designated inspectors from the principal agency office will conduct unscheduled ramp checks to verify compliance with rotorcraft and fixed-wing structural safety guidelines.	
This description is recorded exactly as Southwest Airlines Co.: WN. The description for this air carrier is Horizon Air: QX. Airworthiness directives issued prior to the current amendment cycle remain in full force and effect until superseded by subsequent administrative regulatory orders.	Regulatory Review Scheduled
The recognized two-letter abbreviation code used for this specific airline is DL. This carrier utilizes the two-letter industry designation AA. Non-compliance with established route limitations or authorized abbreviation protocols may result in the immediate suspension of route authority privileges across regulated airspaces.

Section VII: Supplemental Carrier Designations

Reference Index	Carrier Entity Description	Oversight Remarks
IDX-054	The designated two-letter flight code for this carrier is 'UA'. The airline description includes the specific abbreviation ZW. Secondary regional operations are currently subject to review by the administrative oversight committee situated at the primary Washington, D.C. headquarters.	Standard Compliance Confirmed
IDX-056	The official description for this carrier is Trans States Airlines: AX. The official description for this air carrier is SkyWest Airlines Inc.: OO. Operational hubs located within the western aeronautical sector require updated environmental compliance certifications prior to the next fiscal cycle.	Pending Hub Assessment
IDX-058	The description for air carrier 20366 is ExpressJet Airlines Inc.: EV. The description of air carrier 20368 is Allegiant Air: G4. Routine fleet inspections for narrow-body aircraft are scheduled for the third quarter in accordance with updated federal maintenance directives.	Fleet Inspection Scheduled
IDX-060	The description for carrier ID 20398 is Envoy Air: MQ. The description for this air carrier is JetBlue Airways: B6. Seasonal adjustments to the	Terminal Allocation

	approved flight schedules are anticipated to significantly impact terminal utilization rates at major interconnecting hubs.	Notice
IDX-062	The description for this carrier is Spirit Air Lines: NK. The description for this carrier is Piedmont Airlines: PT. The issuance of revised noise abatement procedures has been indefinitely delayed pending further aeronautical study by independent safety consultants.	Acoustic Review Pending
IDX-064	The description string for this carrier is recorded as 'Frontier Airlines Inc.: F9'. The description for air carrier 20445 is Commutair Aka Champlain Enterprises, Inc.: C5. Training mandates for new pilot hires include advanced simulator modules specifically focused on severe weather recovery and emergency multi-engine operations.	Training Mandate Active
IDX-066	The description for this air carrier is Republic Airline: YX. The official description of the carrier includes the abbreviation CP. Maintenance intervals have been officially extended for the turboprop fleet following recent airworthiness directives issued by the international regulatory board.	Interval Extension Approved
IDX-008	The designated two-letter airline code for this carrier is VA. The description concludes with the number 1 enclosed in parentheses. Quality assurance protocols strictly mandate the secure digital archival of all passenger manifest documents for a minimum duration of five calendar years.	Archival Verification Required

<--- Page Split --->

Carrier Designation Continuation Table

Standardized Naming Conventions		
Continuing the regulatory standard, The official description for this air carrier is constructed by taking the formal registration name, appending the exact string ' t/a ', followed by the commercial name, a colon with a space, and finally the two-letter airline code. Formatting guidelines mandate strict adherence to these typographic specifications for all regional operational certificates. The Federal Aviation Administration periodically reviews these naming conventions to ensure clarity in air traffic control communications.		
In standard cases, The official description of the carrier is formed by taking its registered corporate name. A colon followed by a single space is appended directly after the corporate name. Many legacy carriers have transitioned their corporate legal names to simplify branding across global markets.		
To finalize the database entry, The description string concludes with the carrier's two-letter flight code. For instance, The full description string for carrier 21167 is Compass Airlines: CP. The integration of automated scheduling software relies heavily on the accuracy of these exact character strings.		
Furthermore, The complete description for air carrier 21979 is formatted as 'Western Air Charter, Inc. d/b/a Jet Edge: 3FQ'. All designated flight operation systems must reflect these standardized identifiers without unauthorized abbreviation. Any deviation from the assigned alphanumeric format requires an immediate submission of Form 104-B to the regulatory compliance division.
